STAND-ALONE, DOOR-MOUNTED SAFETY SYSTEM FOR SWING DOORS

Our recommended swing door safety sensor is now fully-monitored internally and capable of external monitoring. High definition, self-adapting detection zones, coupled with reduced uncovered zones create the most accurate and reliable safety sensor on the market. Plug and play technology simplifies installation, setup and troubleshooting.

RESTROOM KIT

record's Restroom Kit is ideal for hospital rooms and other single occupancy restrooms found in offices, restaurants and retail shops. The kit features an advanced relay logic module that controls Push Plate functionality along with a "Push to Lock" button, an Occupied Indicator (with sound), an electric strike, and a power supply. A door position switch is also included.
